

# Timothy-Joseph Godwin

London, UK | [tj.godwin1904@gmail.com](mailto:tj.godwin1904@gmail.com) | +44 7961 585 772 | [LinkedIn](#) | [GitHub](#)

## Education

**University of Birmingham** Sept 2023 – 2027 (Expected)  
M.Eng Computer Science with Software Engineering | **GPA: 3.9/4.25** *Birmingham, UK*

- **Relevant Coursework:** Full Stack App Development, Object Oriented Programming, Data Structures & Algorithms, Software Engineering and Professional Practices, Functional Programming, Artificial Intelligence

**Kaplan International College, London** Jan – June 2023  
Foundation Certificate in Science and Engineering | **Average: 85%** *London, UK*

- **Relevant Coursework:** Mathematics: 90%, Information Technology: 88%, Extended Project: 72%

## Technical Skills

**Programming Languages:** Python, Java, JavaScript, TypeScript, C, Haskell, PowerShell

**Data Analysis & ML:** Pandas, Scikit-learn, PyTorch, Tableau, Data Visualization, Predictive Modeling

**Web Technologies:** React, Angular, Spring Boot, HTML/CSS, Bootstrap, Express.js

**Databases & Tools:** PostgreSQL, Git, GitHub, Docker, Azure, VS Code, WSL, JHipster, Vercel

## Experience

**Uptrail** July 2025 – Aug 2025  
Data Analysis Intern/Trainee *London, UK*

- Cleaned and analyzed over 300 customer sign-ups and 120+ support tickets using Pandas, uncovering acquisition trends, regional gaps, and plan preferences to inform targeted marketing strategies for SaaS and e-commerce clients.
- Built Scikit-learn logistic regression model on 1,494 streaming customers achieving 76.6% accuracy, identifying mobile usage and geographic patterns as key churn drivers for targeted retention strategies
- Designed interactive Tableau dashboard integrating 3 datasets (15,822 records) with 6 calculated KPIs, enabling executive strategic planning through geographic mapping and customer segmentation analysis
- Analyzed 2,992 sales records across 499 customers to identify top loyalty tiers and delivery optimization opportunities (41% delay reduction potential) through 6 data visualizations and strategic analysis.

## Projects

**Campus Events Web Application** *JHipster, Angular, Spring Boot*

- Led CI/CD pipeline implementation for 7-member team using Azure deployment, Docker containerization, and GitHub Actions runners in VM environment
- Enhanced user experience by developing responsive design for mobile screens with floating action button navigation and implementing dark theme toggle functionality
- Architected RESTful APIs and resolved database migration issues using Liquibase, ensuring seamless event discovery platform for university students

**Network Firewall Program** *C, Networking, Threading*

- Architected multithreaded firewall server using pthreads with mutex synchronization, supporting concurrent client connections and dual-mode operation (interactive CLI and IPv6 network server)
- Implemented dynamic rule management system with linked-list data structures for Add/Delete/List/Check operations on IP range and port range filtering rules
- Engineered advanced IP validation using inet\_pton() and network byte order conversions, enabling precise IP range matching and connection acceptance/rejection decisions

## Additional Information

**Languages:** English (Fluent), Igbo (Basic), Spanish (Learning)

**Professional Development:** Preparing for AWS Cloud Practitioner certification; self-directed learning on deep neural networks through Udemy; Learning web development through the Odin Project curriculum

**Achievements:** 2023/24 UG Outstanding Achievement Award (SRM Funded); Silver medallist in state-level Physics and Mathematics Olympiads; Top 3 graduating student & Best Student in Further Mathematics (British Spring College)
