# **Timothy-Joseph Godwin**

London, UK | tj.godwin1904@gmail.com | +44 7961 585 772 | LinkedIn | GitHub

#### **Education**

#### **University of Birmingham**

Sept 2023 - 2027 (Expected)

M.Eng Computer Science with Software Engineering | GPA: 3.9/4.25

Birmingham, UK

• Relevant Coursework: Full Stack App Development, Object Oriented Programming, Data Structures & Algorithms, Software Engineering and Professional Practices, Functional Programming, Artificial Intelligence

#### Kaplan International College, London

Jan - June 2023

Foundation Certificate in Science and Engineering | Average: 85%

London, UK

• Relevant Coursework: Mathematics: 90%, Information Technology: 88%, Extended Project: 72%

### **Technical Skills**

Programming Languages: Python, Java, JavaScript, TypeScript, C, Haskell, PowerShell

Data Analysis & ML: Pandas, Scikit-learn, PyTorch, Tableau, Data Visualization, Predictive Modeling

Web Technologies: React, Angular, Spring Boot, HTML/CSS, Bootstrap, Express.js

Databases & Tools: PostgreSQL, Git, GitHub, Docker, Azure, VS Code, WSL, JHipster, Vercel

#### **Experience**

Uptrail

July 2025 – Aug 2025

London. UK

Data Analysis Intern/Trainee

- Cleaned and analyzed over 300 customer sign-ups and 120+ support tickets using Pandas, uncovering acquisition trends, regional gaps, and plan preferences to inform targeted marketing strategies for SaaS and e-commerce clients
- Built Scikit-learn logistic regression model on 1,494 streaming customers achieving 76.6% accuracy, identifying mobile usage and geographic patterns as key churn drivers for targeted retention strategies
- Designed interactive Tableau dashboard integrating 3 datasets (15,822 records) with 6 calculated KPIs, enabling executive strategic planning through geographic mapping and customer segmentation analysis
- Analyzed 2,992 sales records across 499 customers to identify top loyalty tiers and delivery optimization opportunities (41% delay reduction potential) through 6 data visualizations and strategic analysis

#### **Projects**

#### **Campus Events Web Application**

JHipster, Angular, PostgreSQL

- Developed a full-stack web application for university students to discover and review campus events and societies as part of a 7-member team
- Led CI/CD pipeline implementation using Azure for deployment, Docker containerization, and GitHub Actions runners
- Enhanced user experience by developing responsive design for mobile screen sizes and other accessibility features
- Architected RESTful APIs with Spring Boot and resolved database migration issues using Liquibase

#### **Network Firewall Program**

C, Networking, Threading

- Architected multithreaded firewall server using pthreads with mutex synchronization, supporting concurrent client connections and dual-mode operation (interactive CLI and IPv6 network server)
- Implemented rule management system with linked-list data structures for Add/Delete/List/Check operations on IP range and port range filtering rules
- Engineered advanced IP validation using inet\_pton() and network byte order conversions, enabling precise IP range matching and connection acceptance/rejection decisions

## **Additional Information**

Languages: English (Fluent), Igbo (Basic), Spanish (Learning)

**Professional Development:** Preparing for AWS Cloud Practitioner certification; self-directed learning on deep neural networks through Udemy; Learning web development through the Odin Project curriculum

**Achievements:** 2023/24 UG Outstanding Achievement Award (SRM Funded); Silver medallist in state-level Physics and Mathematics Olympiads; Top 3 graduating student & Best Student in Further Mathematics (British Spring College)
